MASKS FOR SAFE WORK PRACTICES

Safe work practices are types of administrative controls that include procedures for safe and proper work used to reduce the duration, frequency, or intensity of exposure to a hazard. Implementing wearing a 3 Layer mask, with the middle layer, or filter, being removable is one of the control measures for SARS-CoV-2 according to The Department of Employment and Labour's workplace preparedness. It is further stated that each employee would need a minimum of 2, **Encourage employees at your facility to keep themselves safe by implementing wearing the recommended mask at all times to stop the spread.**

INTRODUCING THE ULTIMATE COVID-19 CIVILIAN MASK

THE TOGGLE

Our mask is unique when compared to most locally manufactured ones, in that we have included a toggle on the elastic at the back of the head which allows the user to adjust the Mask for a comfortable fit. When designing our mask we took into consideration that people would need to use it the entire day. A tight elastic would cause a lot of tension around the ears causing the user to touch their face frequently which should be avoided.

THE WASHABLE, REUSABLE MASK with superior protection when compared to plain cloth masks! Each mask comes standard with a fibertex filter that gives you excellent barrier and airflow reliability. The filter can be removed, soaked in hot water and can be dried with a cloth and place back into the mask. Available in Adult & Kids sizes.

REPLACEABLE FIBERTEX FILTER

Designed to trap 95% of micro particles above 5um (microns) to help fight against Covid-19. Key to reducing the rate of infection is to disrupt the transport system of the virus. The filter system that our mask uses does exactly that, by trapping any particles that are 5um (microns) or above.

MATERIAL SPECS

100% POLYESTER WOVEN FABRIC 170GSM

Anti-microbial coating/ Water resistant outer fabric
(Bluesign ® APPROVED and Standard 100 by OKEO-TEX ®)

LINING - 200gsm peached Tri Coat warp knit

- The water repellent prevents any droplets from penetrating through the fabric.
- The antimicrobial kills any microbes that are deposited on the outer surface from touching or breathing.
- Wash and launderable.
